

BUSINESS SERVICES AND TECHNOLOGIES OOD (BST) is an IT services and solutions provider, primarily engaged with Implementation and Maintenance of SAP and other business information systems, IT Infrastructure services, Information Security solutions, Business development and Project Management. We are working on projects around the world: almost all countries in Europe, Middle East, USA and Africa. We are a strategic partner of the biggest SAP Services providers where we are delivering Implementation and Support services.

We value our customers and we are focused entirely on satisfying their needs, solving complex business problems, improving their performance and assisting them in meeting the everyday and global challenges. Further, we value our employees and their satisfaction is one of the company's primary objectives and a guiding principle.

We are looking for IT System Architect Linux who will work within the AMS support for one of the biggest global SAP companies

Your tasks

- Conception and further development of the existing cloud landscape
- Optimisation of operating systems and central services (DNS, LDAP, Mail, Samba, ...)
- Sustainable troubleshooting in Linux operating systems (SuSE Linux Enterprise)
- Design of monitoring and analysis solutions (Nagios, Zabbix, SAR)
- Automation through scripting (Bash, Python, Perl)
- Implementation of projects, evaluation and introduction of new technologies and documentation and knowledge transfer

What you should bring with you:

- Degree in computer science or vocational training in IT (eg IT specialist)
- Very good technical understanding of Linux operating systems in cloud environments
- Knowledge in the implementation and operation of central services
- Experience in the virtualisation of server landscapes (Xen, VMware)
- LPIC certification desirable
- Practical experience with automation and configuration management (bash, scripts, PXE)
- Good command of spoken and written English
- Willingness to offset working hours and on-call time
- Analytical thinking, solution-oriented work and teamwork

WE OFFER YOU:

- To join one of the fastest growing and successful companies in the field of information technology.
- To work in a friendly, motivated and achievement-oriented team of professionals.
- Challenging assignments and career development opportunities.
- Excellent remuneration package.
